

Innovative PMP and PSM certified, IT Project Manager-Scrum Master specializing in leading IT software development and implementation teams to successful on-time, on-budget go-lives in complex global/multi-cultural environments. Experienced in highly regulated industries such as pharma, aerospace, chemical manufacturing and nuclear energy. Project management expertise is leveraged utilizing extensive experience in operations management roles.

Project Portfolio

- Global ERP
 - Program Manager for business support and change management for 18 successful go-lives of a global Enterprise Resource Planning system in 7 countries
- CMMS (Computerized Maintenance Management System)
 - Successfully migrated all data and implemented a new CMMS system for a large, heavily regulated manufacturing plant with over 10K pieces of equipment and 100+ member maintenance organization
- Process modeling and advanced scheduling system implementation
 - Program Manager for 2 separate implementations of Simio process modeling software. Project included integral change management and departmental work reorganization
- LIMS laboratory information management system
 - Implemented a new LIMS in a large, heavily regulated manufacturing plant. System is used daily by over 60 technicians
- ETL and Data Visualization
 - Various extract, transform and load projects where data is pulled from legacy systems, transformed/cleaned and uploaded to or live-interfaced to new systems.
- Requirements and Configuration Change Management
 - Upgraded change control system using Dassault Enovia to manage configuration control in a regulated manufacturing operation
- Learning Management System
 - Provided PM support for the testing and startup of a learning management system for a large national restaurant chain headquarters and franchises. The system is used by over 1700 restaurants and 5000+ learners
- WMS warehouse management system
 - Led development and deployment project for a mobilized warehouse management system
- Oracle Primavera P6 Rollout
 - Directed configuration, change management and rollout of Primavera P6 project and work management system
- Work Management Reorg
 - PM and SME for a large maintenance and work management organizational design and reorg project
- Engineering Reorg
 - PM and SME for a large engineering and design department organizational design and reorg project
- Capital expansions
 - Project Manager for three separate major manufacturing capital expansions and start-ups averaging \$40M each
- Lean Projects
 - Developed and implemented 6 bottom-to-top reengineering projects to deliver capacity increases of 60% - 100%. Techniques included Kaizen, 5S, and other Lean tools.
